Abstract of JP 2000325192 (A)

PROBLEM TO BE SOLVED: To provide a supporter of exhibits which can display an exhibit in an inclined condition without using a display device provided with an inclined shelf, and which can change the inclination angle of the exhibit. **SOLUTION:** This device is a supporter of exhibits which can support an exhibit 2 in an inclined condition. It comprises a carrying portion 15 which contacts with the installation surface 5 and carries the bottom of the exhibit 2, a rear portion 16 which contacts with the back of the exhibit 2 and backward supporting portion 17 which contacts with the installation surface 5 behind the rear portion 16. By making variable the angle A of the contacting part of the rear portion 16 and backward supporting portion 17, the inclination angle of the exhibit 2 can be changed.
